
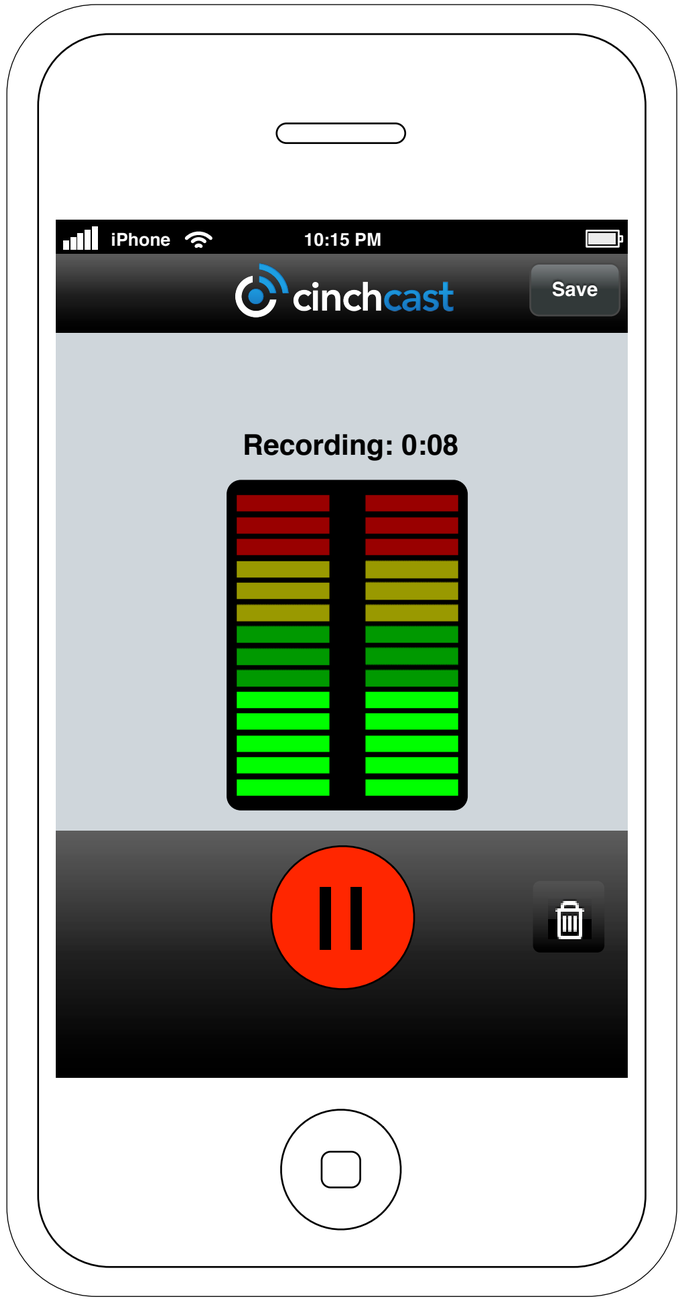
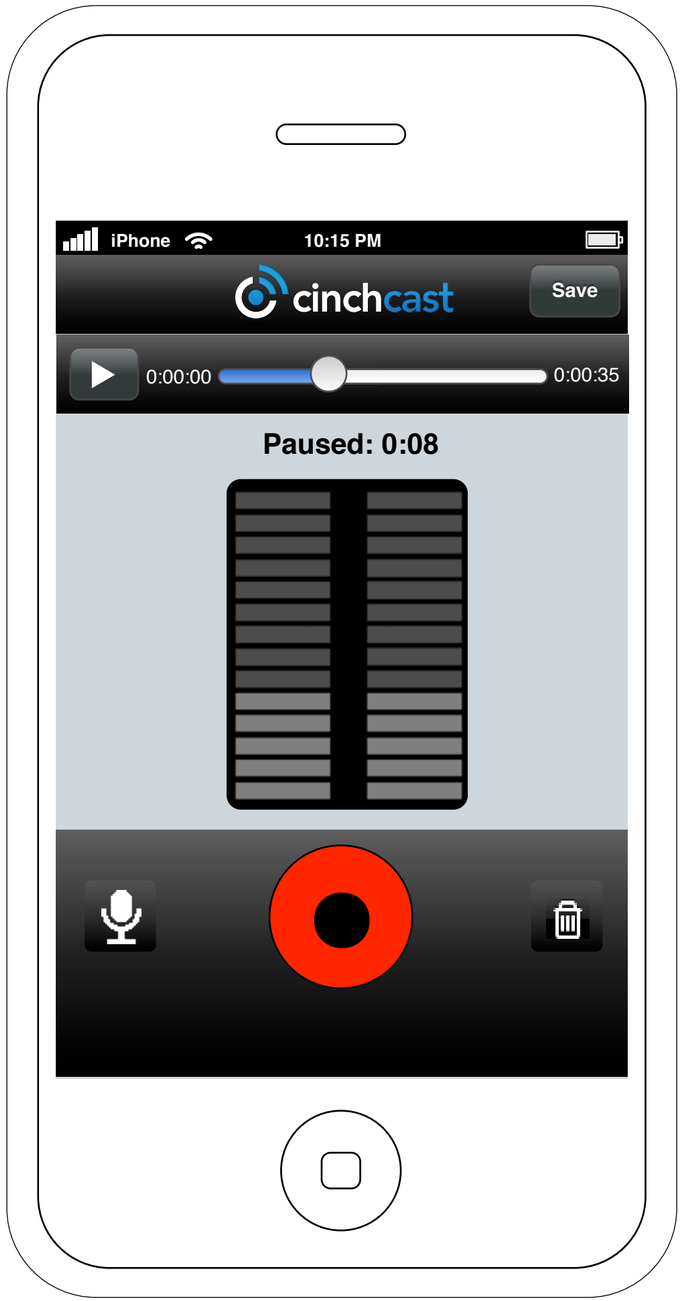
1. 'Select Input' button

2. The record button is 88px diameter and near the bottom of the screen for ergonomic reasons.

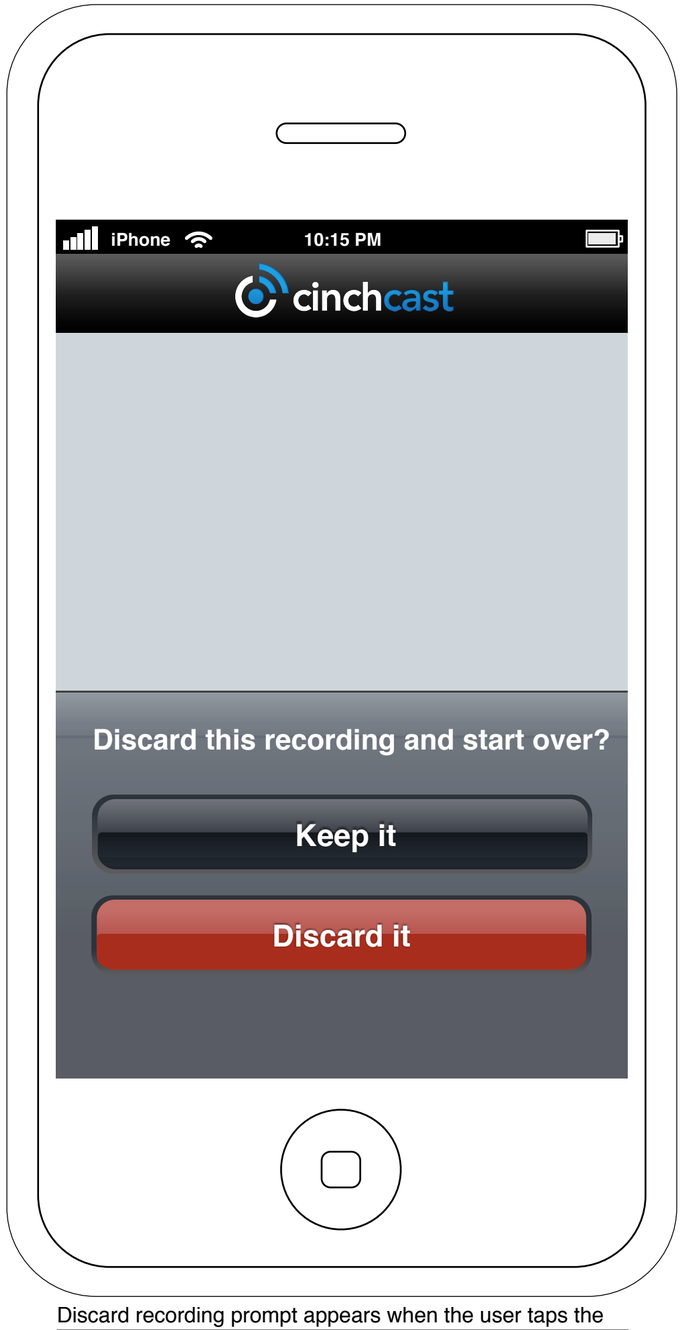


Hide the audio input button during recording

Tapping the pause button pauses the recording (see pause screen). Tapping "Save" will pause the recording and advance to the save screen. Tapping the trash button will pause the recording and open the discard recording modal.



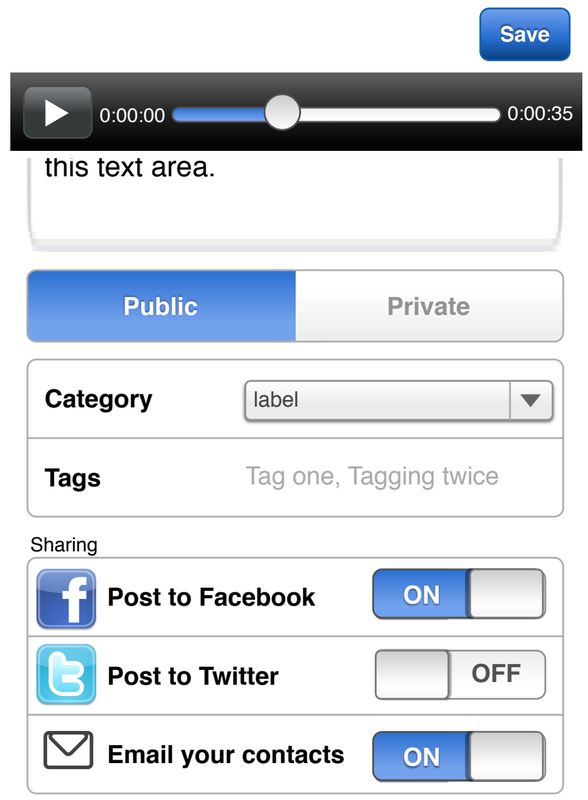
Paused State displays the audio player. This is a universal layout and placement for audio playback. Tapping the record button resumes recording where it stopped. Tapping the trash button displays a confirmation prompt.



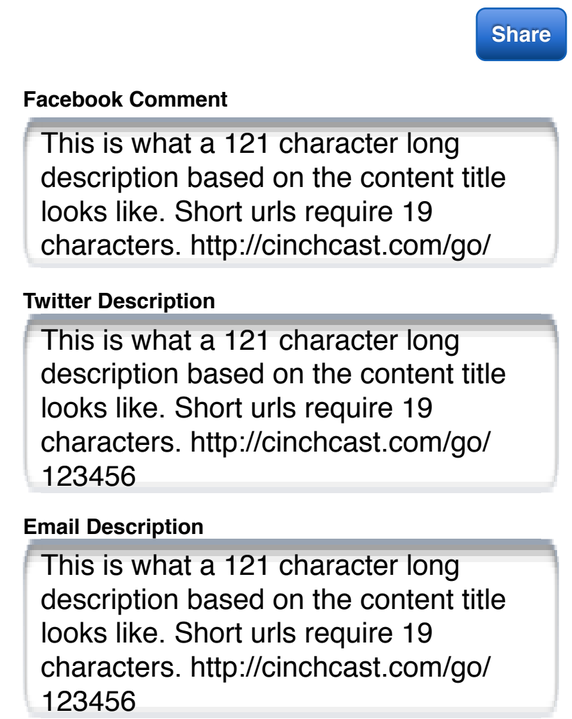
Discard recording prompt appears when the user taps the trash button.

The audio input picker appears when you tap the "Select Input" button

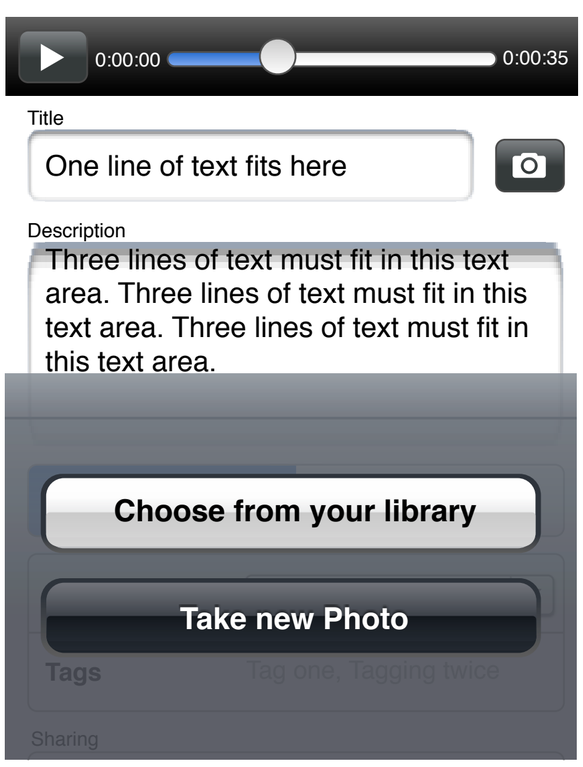
The Save Form. This form will extend below the fold and be scrollable. The audio playback module is "fixed" to the top of the screen and will not scroll. Tapping cancel will go back to the paused recording state. It will not discard the recording.



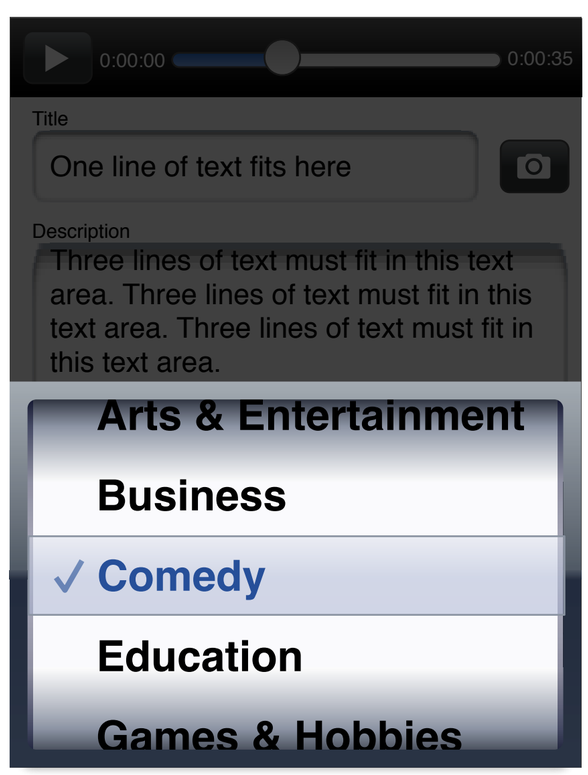
This shows the bottom half of the save form that appears "below the fold".



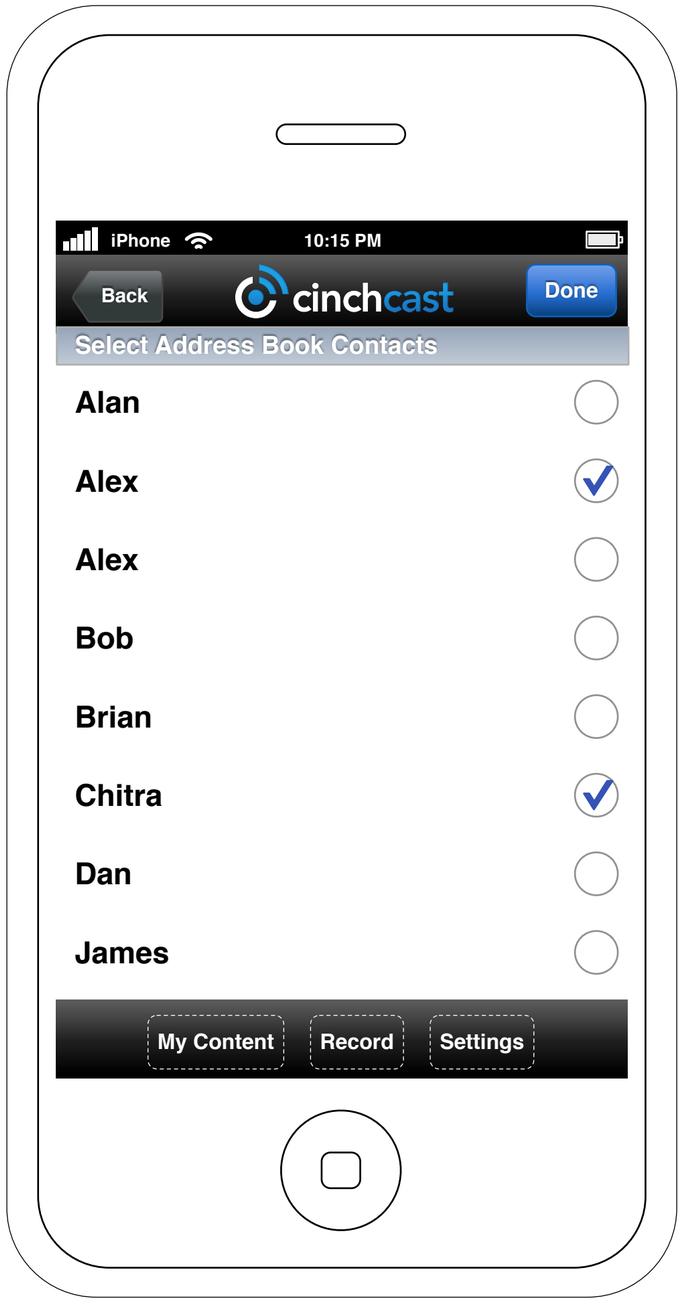
Share Confirmation:
We insert this screen if the sharing platforms are enabled in the save workflow. This allows the user to further customize the messaging that's distributed.
* i have a suspicion this could be reduced or removed.



Tapping the camera icon opens a modal allowing you to select an input.

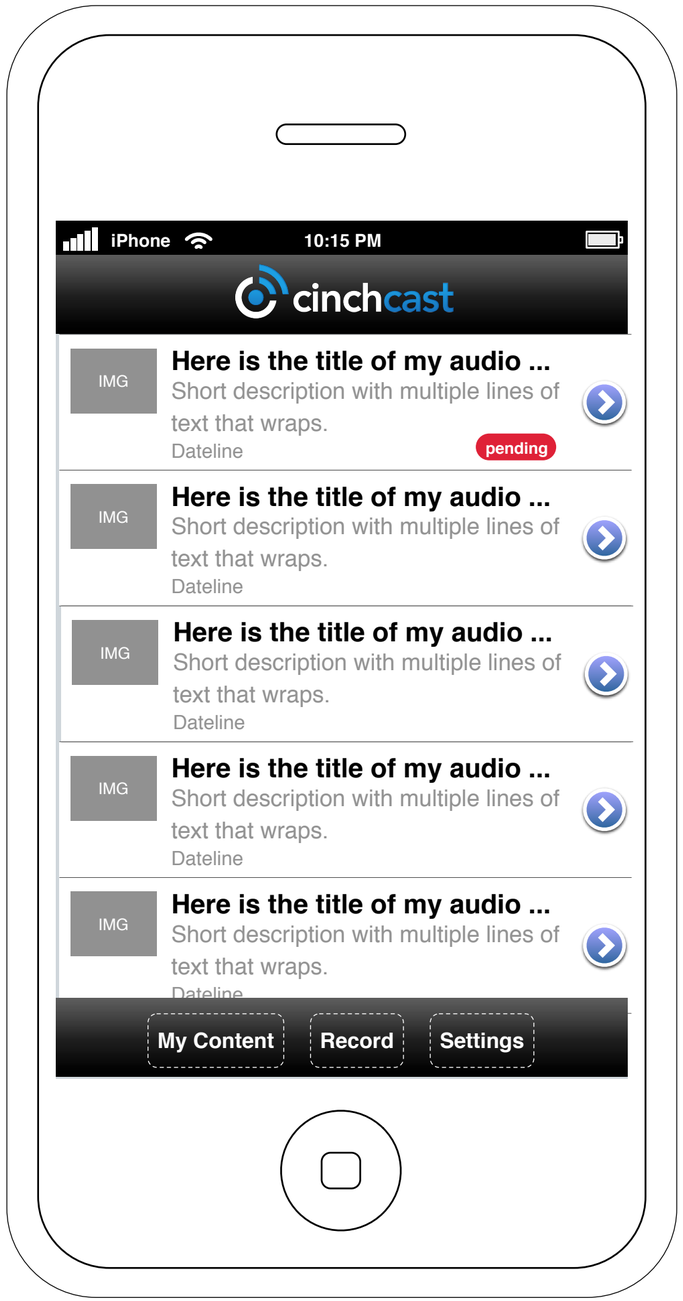


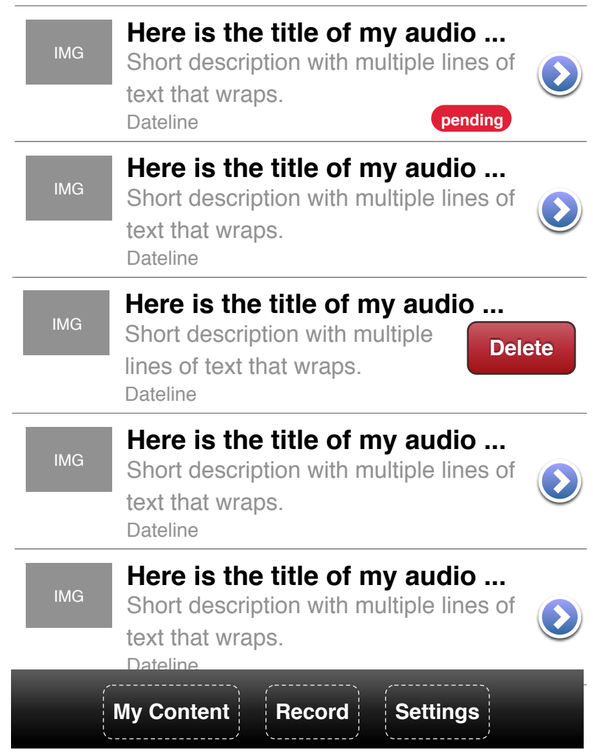
Tapping the category pulldown in the Save/Edit form will display this category picker.



~~If you choose to share with email contacts we display a list of contacts.~~

Share Confirmation:
We insert this screen after you tap "Share" in the edit screens. This allows the user to further customize the messaging that's distributed. This is replicated for all the supported sharing platforms.
* i have a suspicion this could be reduced or removed.





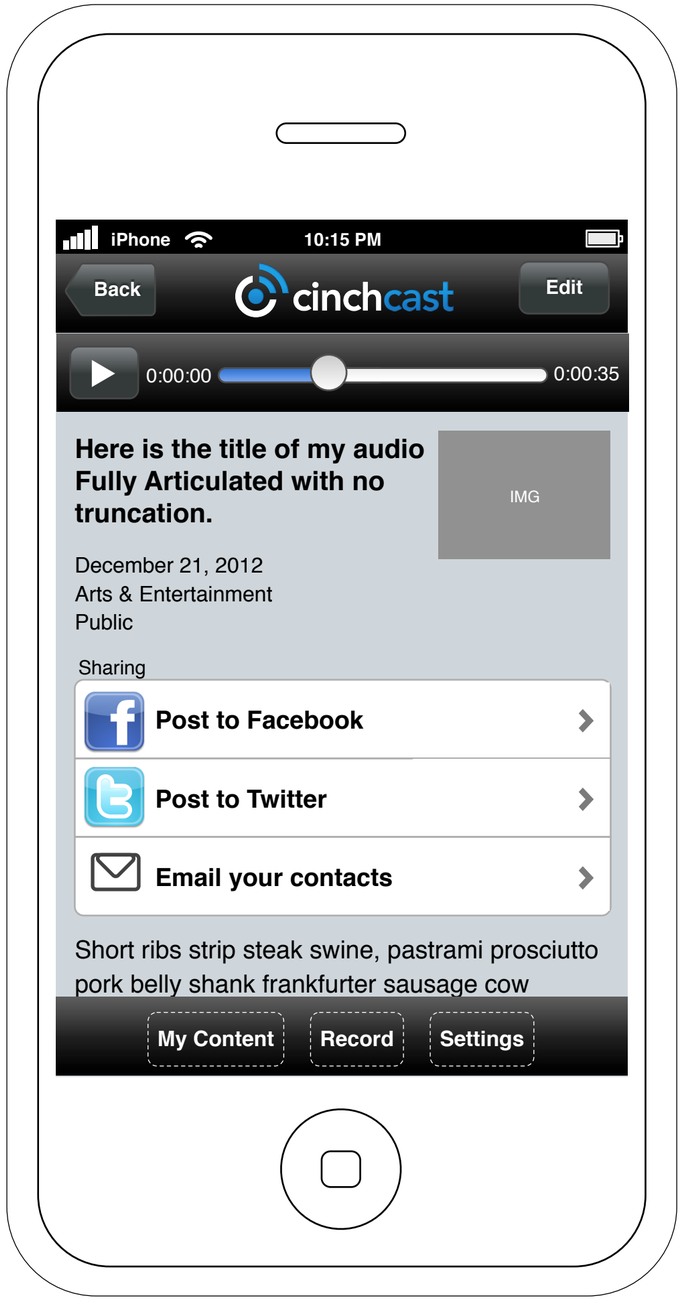
My Content:

The "Pending" alert displays on clips that haven't been uploaded to the server yet.

My Content:

Swiping across the row will display the delete button.

Tapping on a row will drill down to the content page



Content Detail

Tapping on the image thumbnail will open the image full screen. Tapping on the sharing options will drill down to the Share Confirmation screen. Tapping edit brings up the save form.
